

Nestor J. Calderón A.

Freelance Full-Stack Developer & IT Professional

Santo Domingo, Dominican Republic · rotsen93@gmail.com · github.com/rotsen93

SUMMARY

Freelance full-stack developer and IT professional with 15+ years across systems administration, networking, and security. Currently building AI-assisted products that solve real-world problems.

EXPERIENCE

Freelance Developer & IT Consultant

2023 – Present

Independent · Santo Domingo, DR

- Building full-stack applications with React, TypeScript, and Supabase while learning AI-assisted development.
- Providing IT support, networking, and infrastructure consulting for local businesses.
- Developing three active products: NEST (ADHD productivity), FiaoControl (credit management for corner stores), and Musify Distro.

IT Support & Security Analyst

2021 – 2023

Sirix International · Santo Domingo, DR

- Provided first-line technical support across a nationwide call-center operation serving banking clients.
- Managed the domain server and Linux-based dialers, and configured the company's internal IP telephony.
- Acted as security analyst, monitoring network traffic and enforcing security policies with zero breaches.

Systems & Billing Analyst

2018 – 2019

Excellent Integrity Solutions · Santo Domingo, DR (Remote)

- Managed 13 billing cycles for Viya (U.S. Virgin Islands), scheduling and monitoring automated billing bots 24/7.
- Coordinated with the outsourcing partner that converted invoice files to PDF.
- Supported a remote billing system end-to-end, ensuring daily runs completed on schedule.

Head of Technical Support & Networking

2017 – 2018

Mobile Gallery · Santo Domingo & Santiago, DR

- Led the technology department for an Altice distributor with 41 stores across Santo Domingo and Santiago.
- Rebuilt the network infrastructure, reconfiguring computers, printers, cabling, and network points company-wide.
- Analyzed system operation to identify and resolve failures, prioritizing support across all stores.

Field Technical Support

2012 – 2013

LC Solutions Group · Santo Domingo, DR

- Provided on-site network support to client companies nationwide.
- Installed hardware, antivirus, servers, printers, IP phones, firewalls, switches, access points, and security cameras.
- Performed database analysis, backups, and document recovery for client systems.

Technical Support

2009 – 2011

Ministry of Foreign Affairs (MIREX) · Santo Domingo, DR

- Part of the network management team responsible for keeping every terminal fully operational.
- Configured printers, assembled access points, and programmed a Windows Server running Active Directory.
- Supported users through a ticket system across a large user base.
